## FINANCIAL AND COMMERCIAL. MONEY MARKET.

TURBLAY, July 17—6 P. M.
The stock market has taken just the course we anticipated; the course that eve you must have anticipated who has for some weeks past watched the movements soing on in financial affairs. The banks have been going on steadily for some weeks this work of xp naion, and thy have now become a figure which cannot be sustained. A line of discounts of thirty e.g.: and a half million of dollars, in the middle of July, with a dull, inactive state of business, s an infistion unprecedented in the history of be king in this city. With an active dominal for money, and a corresponding expansion a bank oredits, we should soon that cause for starm. There must be some change in this banking movesent. It is protty certain that the banks cannot as active business would require. They must re-duce their call loans and accommodate the mercan-ite classes the moment a demand springs up in that to the merchants which may for a time be required, without altering the figures of the aggregate materially. Of the seventess millions increase in bank loans since the 30th of December last, the bulk is on the hypothecation of stocks. This added to that class of loans previous to that time, will, according to our data, make of the total full one-third in loans on stocks. For many months the banks have been unable to get first class business paper. In the face of that fact we have seen a steady expansion in the liscount line. In the past s'x weeks-the dullest the year—the banks have increased their loans nore than seven millions of dollars, and no one can for a moment doubt that every dollar of that large been loaned on stocks. The speculative baracter of the stock market during that period is the best evidence in the world of the fact. The backs may be compelled in dull times to employ their capital and deposi's in fostering stock specu-lations, for stockholders look for dividends regularly every six months, but they cannot continue their leans to brokers to the exciusion of the com-mercial classes, or grant all the facilities both re quire in active times. The banks have, it is true, a large specie reserve, but they must look to their deposits. They discount on their deposits and not on the epecie which they are obliged to keep in their vanits. The deposits are large, but they will be required to move the new crops. The country backs have large balances here, which will be considerably reduced as soon as the harvests have been secured. We look for an active business throughout the fall, and an active demand for money from usiness for business purposes.

The variations in the market to-day, compared

with the prices current at the close yesterday, we e as follows:—Erie bonds, 1875, declined ; per cent; Louisiana 6's, 2; Illinois Central bonds, 12; Canton Company, ‡; Nicaragua Transit, ‡; Cumbarland Coal, ‡; Hrie Ballroad, ‡; Hudeon Rullroad, ‡; Harlens, ‡; Reading Rallroad, 1‡; Michigan Southern, ‡; Michigan Central, 1½; Cleveland and Tolodo, 1½; Chicago and Rock Island, ‡. It will be seen that a lutocks were down to-day, and that some of them have fallen considerably. Prices will take the back track new for a time, which will bring most stocks down to about their proper level.

At the second board there were large sales of

Frie Railroad etock at a decline of | per cent. About twenty-five hundred shares changed hands, showing a desire on the part of holders to realize. Cumber-tand Coal feel off ‡; New York Central Bailroad, ‡. Reading Bailroad sold a: 94½ for the epening. The market olosed weak.

The Uties Telegraph states that the coupons for interest and bonds of the Ogdensburg, Clayton and Rome Railread have not been paid.

The Bank of the Ohio Valley, located at Rushville, Indiana, has recently commenced operations with a capital limited by its charter to \$400,000. Hon. J. Helm is President, and E. L.
